

# Oklahoma Soybean Board

Current fiscal year  
checkoff investment  
in production research

**\$163,035**

## TOP RESEARCH FUNDING AREAS

- Weed Management in Diverse Growing Conditions and Production Systems
- Feral Swine Control of Soybean Fields and Crops
- Improving Agronomic Management of Soybeans Including Pesticides, Cover Crops, Maturity Groups and Planting Dates

## RECENT INNOVATIVE RESEARCH PROJECTS

- Use of High Oleic Acid Soybean Oil in Cattle Feedlot Rations
- Improving Management of a Soybean Double Crop System

## TOP THINGS FOR FARMERS TO KNOW ABOUT CHECKOFF DOLLARS INVESTED IN RESEARCH

The projects are evaluated and approved by a five-member board of soybean producers who provide input about which types of research are most helpful to their fellow soybean growers.

## TOP AREAS OF RESEARCH CRITICAL TO THE FUTURE OF OKLAHOMA'S SOYBEAN PRODUCTION

How best to control feral swine which continue to destroy more soybeans each year. In addition, weed management is important especially as the rules for various herbicides are changing frequently.

*Sweet Success*

**ONE OF THE BIGGEST SUCCESS STORIES IN OKLAHOMA AS A RESULT OF RESEARCH:**

Oklahoma Soybean Board collaborates with organizations in the state and the region for improved farmer productivity and profitability. Recent checkoff funding has supported feral swine control in Oklahoma and neighboring states. Because feral swine travel across borders, a regional effort is in place to reduce the overpopulation of these crop-destroying pigs.
