

Southern Soybean Research Program

Research Facts

Current fiscal year
checkoff investment
in production research

\$35,500

TOP RESEARCH FUNDING AREAS

- Soybean Disease
- Nutrient Management Technology

RECENT INNOVATIVE RESEARCH PROJECTS

- Technologies to Improve Nutrient Uptake and Reduce Excess Fertilizer Use in Soybeans
- Determining the Effect of Different Management Strategies on Target Spot of Soybeans
- Developing Irrigation Management Strategies for Soybean Production in Humid Regions of the Southern U.S.

TOP THINGS FOR FARMERS TO KNOW ABOUT CHECKOFF DOLLARS INVESTED IN RESEARCH

The Southern Soybean Research Program invests checkoff dollars from producers in Alabama, Georgia, Kentucky, South Carolina, Tennessee and Texas in research that benefits the region. SSRP funds research that is collaborative and serves to maximize return on investment.

TOP AREAS OF RESEARCH CRITICAL TO THE FUTURE OF THE REGION'S SOYBEAN PRODUCTION

- Emerging Soybean Diseases
- Water Use and Needs
- Soybean New Uses Demand

Sweet Success

ONE OF THE BIGGEST SUCCESS STORIES IN THE REGION AS A RESULT OF RESEARCH

The SSRP looks for projects that will enhance soybean production practices in the region while preventing redundancy to ensure checkoff dollars go further and allowing more work with limited resources. Several projects have been building blocks to larger, national-in-scope work.
